

Email Guard

Advanced Email Protection

rocket IT

Businesses are targeted

Ransomware gangs target all businesses today. They will try to gain access to steal data, then encrypt your data.

Phishing

The common end game for cyber criminals is to trick you into giving up your login credentials via a look-a-like service you use.

Multi-layered protection

It is essential to protect users from malware based and malware free email threats with a multi-layered solution including automated email encryption.

Advanced Email Protection

The solution protects your people from malware-based threats, like malicious attachments or links and from malware-free threats like email fraud or credential phishing emails.

Our multi-layered anti-virus, anti-spam and phishing detection engines give you the best possible protection against malware-based and malware-free email threats. All your emails are scanned by sophisticated engines. They quickly, accurately and effectively capture and block all known threats.

Heuristics scanning protects you against unknown threats in real-time.

Most attacks target people. They entice them to click on a link in an email or open an attachment. We leverage the advanced power of Targeted Attack Protection. This technology provides you with URL and attachment sandboxing analysis.
