

Humans are targets

36% of data breaches involve phishing.

Humans make mistakes

90% of data breaches involve human error.

Compliance is vital

Key standards like ISO- 27001 require regular staff training.

Transform your employees into your first line of defense

Whether it's sharing passwords with colleagues, emailing sensitive data to the wrong recipient or falling victim to a phishing attack, employees are seen as the 'weakest link' in your cyber security.

That's why it's vital to understand where the human vulnerabilities exist within your business and to train staff regularly to reduce the risk of a data breach, fines or damage to your business's reputation.

Human Risk Management (HRM) is the new class of user-focused security that enables you to do just that through personalised security awareness training programs, periodic phishing simulation campaigns, simplified policy management and ongoing dark web monitoring - completely managed for you.

Service Options

Awareness Training is provided as an ongoing monthly subscription service, just like M365.

Benefits-at-a-glance

- Drive user resilience to recognise common security attack vectors
- Reduce user-related security incidents caused by human error
- Demonstrate compliance with key standards like ISO 27001
- Understand your business's employee security posture with a human risk score
- Dig deep into ongoing human risk with training and phishing exercises
- Save time with readily-made courses and phishing campaigns
- Simple setup, fast deployment and automated staff training reminders
